About me

I'm Mariana, Portuguese IT Consultant | Industrial Engineering and Management. I had opportunity to gain some experience in application development, as well as, process design and planning. I'm particularly interested in project management, programming, and people management topics. The ideal next step in my career is to deepen my knowledge and experience in the area of project/people management so that in the future I combine the 3 topics that fascinate me the most and put them into practice in the best way, more efficiently and having a positive impact on people's lives. I greatly value being part of a multicultural/diverse and forward-thinking environment that encourages the continuous development of personal skills and knowledge.

Work Experience

SAP Technical Consultant
ACCENTURE

Set. 2022 - to Present

- Work at a international project.
- Identify scope, define requirements and create functional and technical specifications.
- Analyze, design, build, and test new components or enhancements to existing modules, including reporting and analysis capabilities.
- Performance analysis and tuning.
- Ensure applications are operating according to service commitments.
- Training new joiners in abap programming
- Preparation of presentations for meetings and their minutes.

SAP IS-U: 2.5 years of experience, during which I had contact with Invoicing, Billing, Migration and Replica areas.

Operations and Process Design (Master's Thesis)
LIPOR

Mar. 2022 - Jul. 2022

The organization developed a product from recycled Polypropylene which won an international award from FAMAE. Lipor wanted to launch its first product on the market by establishing a B2B business model:

- Planning and design of processes related to the company's new product.
- Supply chain logistical planning, with MRP development.
- Define KPIs and develop monitoring tools.
- Define requirements, procedures and create protocols to ensure the quality of the components.
- Design and support the implementation of the layout of the warehouse and the workplace.

Keywords: MRP, BOM, KPIs, Kanban, Layout, Logistics, Lean, Quality Control, Process modeling, LaTeX, Excel, VBA.

Awards

3rd place - World Data League 2023

WDL is an international non-profit competition that gathers the best minds in the Data Science field to develop long-lasting solutions for social impact challenges. Member of "CEOS" team, we finished the international competition in 3rd place among 29 teams. This was an incredible opportunity to learn from experts and connect with people from all over the world.

Volunteer staff

Cyclones Sports

Cyclones Sports is a young and dynamic team, capable of facing any challenge in supporting and managing the organization of sporting events.

Every year I am part of the staff of one of the biggest athletics events in Viana, the Manuela Machado Half Marathon.

LC Party Kids

LC Party Kids is essentially aimed at entertaining children at events such as birthdays, weddings and baptisms.

Sports

Swimming (federated athlete) 2009 - 2014
Athletics (federated athlete) 2013 - 2019
Dance (Lindy hop) 2023 - Present

Other interests

Music; Dance; Drawing; Poetry
